

## Bridges to Schools for KS2 and KS3

£60 per session + admission of £3.50 per pupil

9<sup>th</sup> – 11<sup>th</sup> October 2019

Inspired by the new Mersey Gateway Bridge, close to Catalyst, your pupils will learn about cable-stayed bridges. They will take on roles as engineers and need to work as a team to construct their very own 13m cable-stayed bridge. Will they be brave enough to try walking across it when it's complete?

*This workshop is supported by the NW Institution of Civil Engineers.*
