

Chemistry at Work for KS3

Admission FREE and in some cases we can offer transport bursaries too.

23rd – 26th June 2020

Chemistry at Work returns for 2020 to enthuse and excite all who visit. It's an amazing opportunity for pupils to put the science they learn in the classroom into context within their everyday lives by taking part in fun, STEM related activities provided by companies such as Inovyn, SSE and RS Clare.

This workshop is supported by the Royal Society of Chemistry
