

## Operation Earth for KSI and KS2

£40 per session + admission of £3.50 per pupil

**Operation Earth** is part of a national programme to engage, inspire and involve school age children with NERC's world-leading environmental science research. The programme highlights the relevance of contemporary environmental science issues to everyone's daily lives and to society's future. It was developed by ASDC and three development partners - Dynamic Earth, Eden Project and Natural History Museum - with scientific expertise from NERC.

Catalyst is thrilled to be helping deliver this project.

The 40 minute show features Earthy who is feeling poorly. Pupils become trainee environmental scientists to investigate Earth's land, air and oceans to see if together they can find solutions.
