

Sponsor an element on our unique interactive periodic table!

Joining our Partnership scheme will allow you to receive a range of benefits while helping to provide an exciting programme of events for families and schools, develop our exhibitions and galleries for all our visitors and preserve our archive collection!

As a charitable trust, Catalyst is the only science centre and museum in the UK dedicated to the science and technology behind the chemicals industry and its impact on our lives, past, present and future. Based in a Grade II listed building in Widnes, where the chemical industry flourished for over 170 years, Catalyst holds a unique position as a museum, a national industrial archive and an educational resource. Through a range of interactive exhibits, workshops, science shows, historical talks and displays, we have been inspiring and educating people of all ages for over 35 years!
